

NAB petition 04-160 to reject satellite radio broadcast of weather and traffic reports is an affront to my need for that information. I travel in and around Chicago and I need that information to get to my destinations on time. Regular radio does not provide instant weather or traffic. Without this service, I will be a victim of over trafficking on the local express ways. In service to others, I ask you to reject this petition so that I can have the information I need.
